

TreeTalk

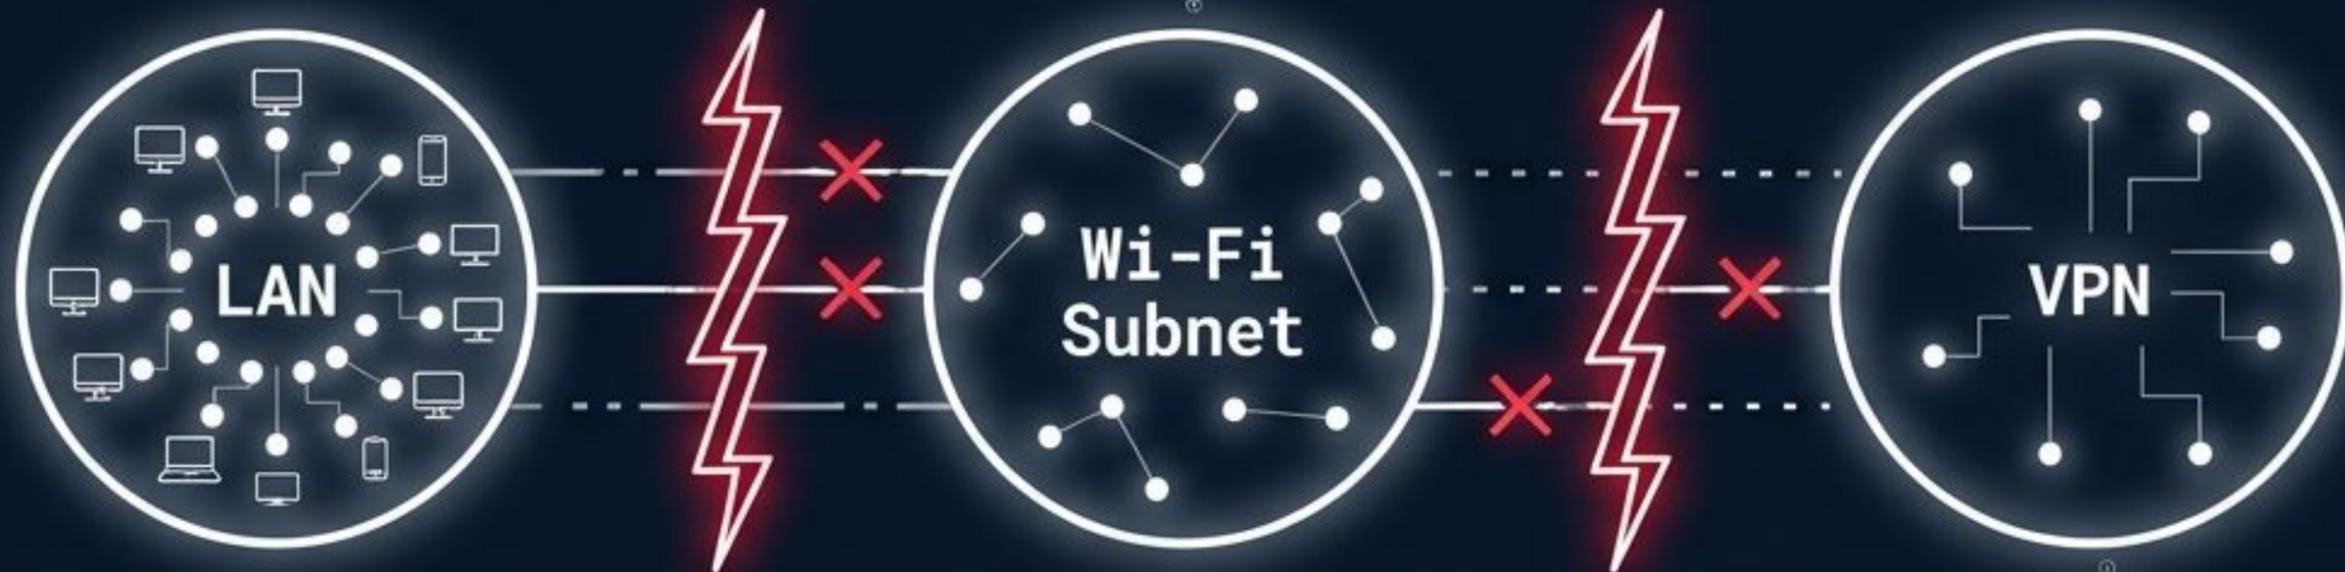

N TreeTalk
Node

Fast, Private file transfer and team messenger for real-world local networks

File sharing that never leaves your office.

Real offices are messy.

Most workplaces deal with mixed environments, not pristine cloud ecosystems.

-  **Legacy Support:** Mix of Windows 10/11 and legacy Windows 7.
-  **Network Segmentation:** Fragmented LANs and VPN bubbles.
-  **Policy Constraints:** Strict IT rules forbidding external cloud storage.

Teams still struggle with internal file exchange.

- Cloud tools blocked or unreliable.
- Internet required for simple transfers.
- USB sticks + email chaos.
- SMB shares confusing or restricted.
- Legacy LAN messengers outdated.

Result: Slow workflows. Security risks. Frustrated users.

TreeTalk Node

Offline-first file transfer + team messaging.

- Works fully locally (LAN/Wi-Fi/VPN)
- Auto-discovers peers (No IP config)
- Direct PC-to-PC transfers (E2E Encryption)
- No installation required

Zero configuration, immediate connection.

No servers • **No accounts** • **No setup**

Technical robustness meets business simplicity.

IT ADMIN / TECHNICAL

Offline-first / Server-free

Fast direct transfers

Auto discovery & Windows 7+

Integrated chat + logs

OFFICE MANAGER / BUSINESS

Zero infrastructure cost

No installation required

Clear licensing

Strong privacy story

Filling the gap between the Cloud and the USB stick.

More secure than USB. Faster than Cloud. Simpler than a Server.

	TreeTalk Node	Cloud Apps	USB/Email
Offline Capable	✓	✗	✓
Instant/No Setup	✓	✗	✗
Legacy Support	✓	✓	✓
End-to-End Encryption	✓	✓	✗

From the classroom to the warehouse.

SMB Offices

5-100 PC environments.

Industry/Logistics

Spotty internet, strong Wi-Fi.

Education

Broadcast files to students instantly.

Prosumers

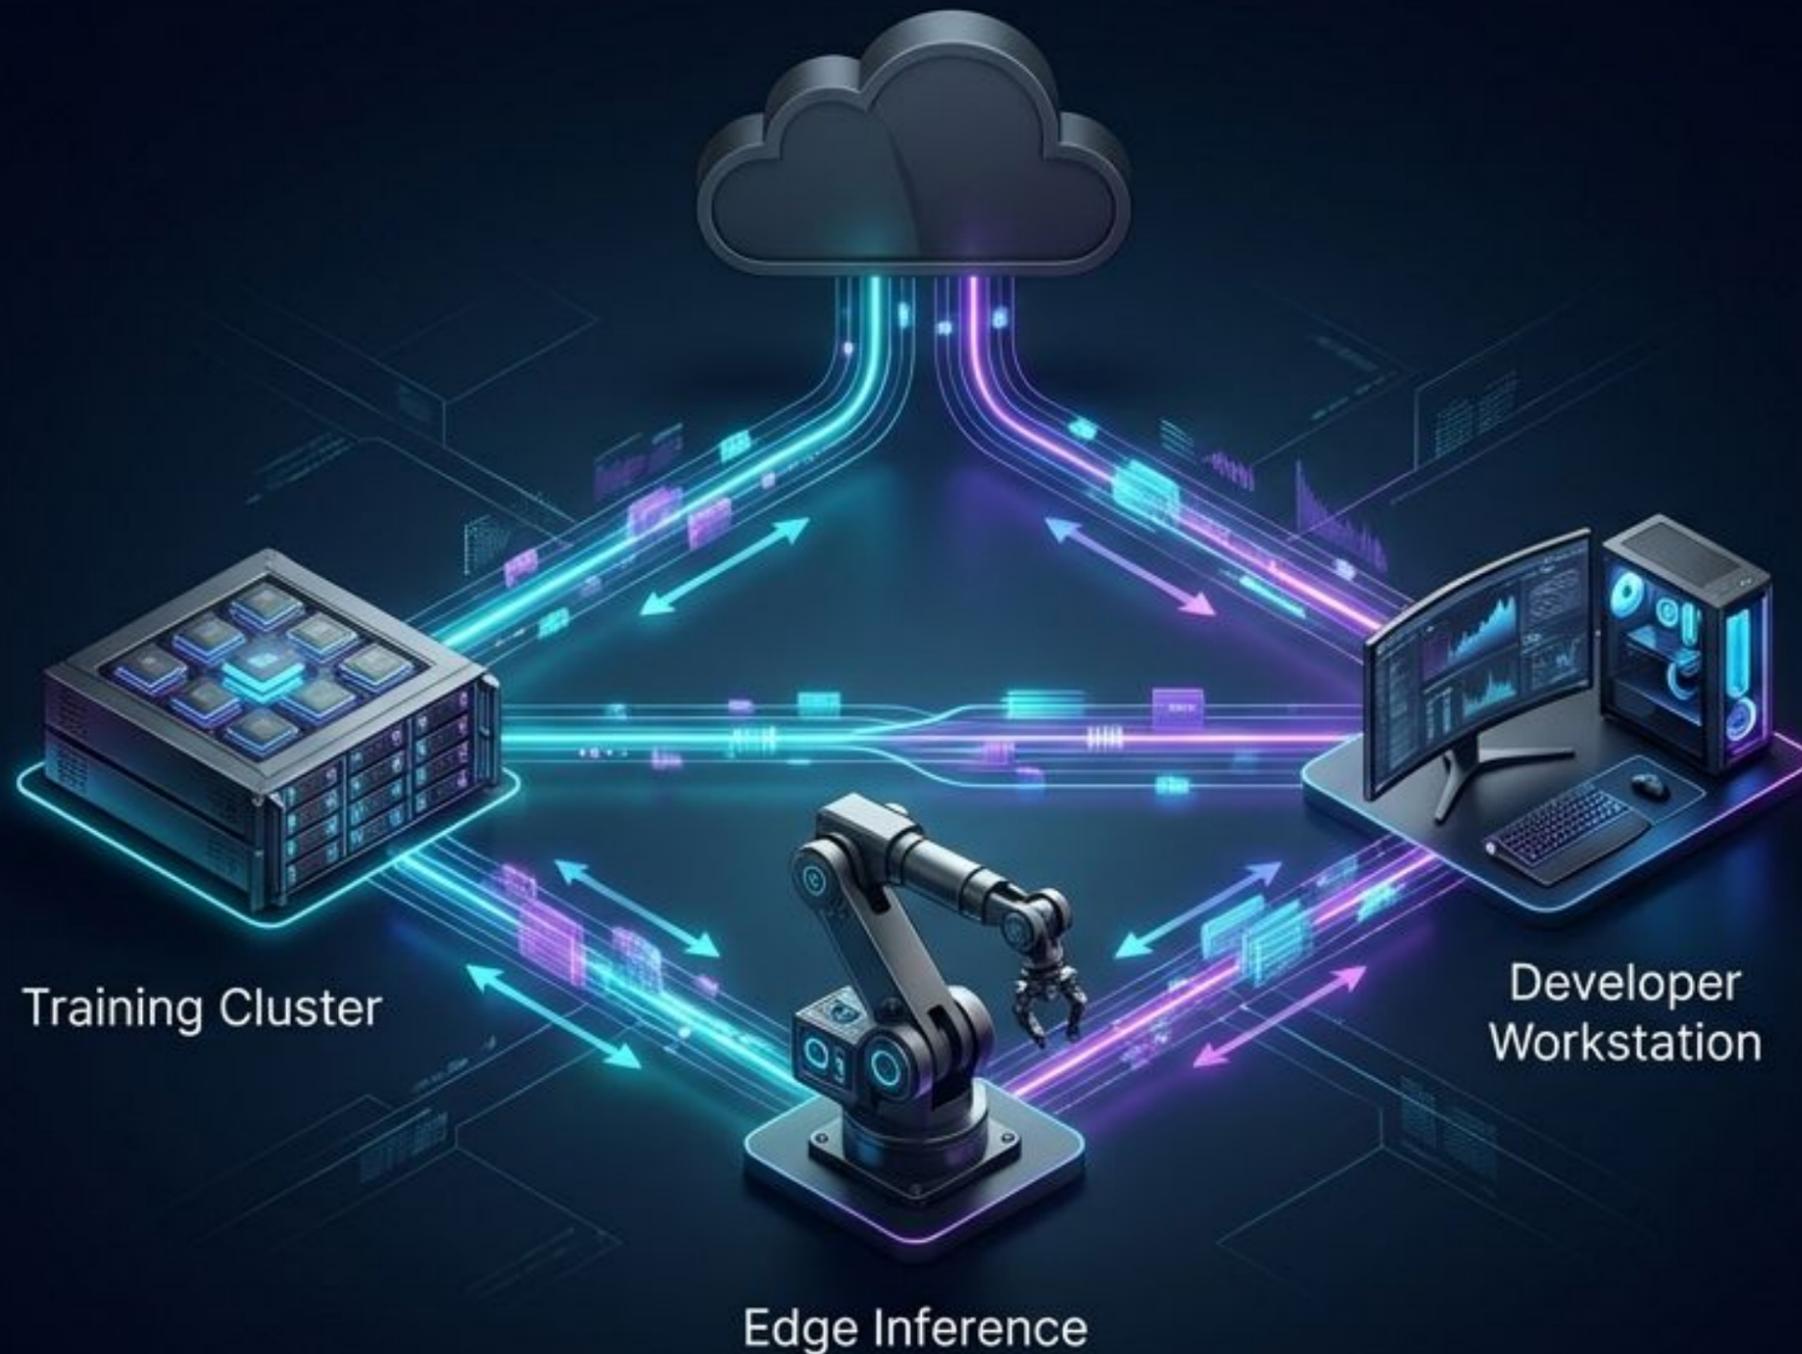

Multi-PC home labs.

Solving daily headaches.

- ✔ **Immediate Handoff:** "Send this file now."
- ✔ **One-to-Many:** Broadcast to entire class.
- ✔ **Ad-Hoc Networks:** Field deployment.
- ✔ **Industrial:** Machine-to-machine logs.

Infrastructure for Local AI Workflows

Secure Mesh Layer

TreeTalk Node acts as the transport layer for LLM model distribution and massive dataset management without cloud ingress/egress.

Unified Workloads

Seamlessly connects distributed AI components—from training clusters to edge inference units—regardless of physical location within the LAN/VPN.

Resilience & Reliability

Offline-First architecture ensures AI agents and workflows continue functioning perfectly even if the external internet fails.

One-Year / Five-Year Eco Impact

Cloud Storage

25kg CO2
per TB/Year

TreeTalk P2P

75% Reduction

in CO2 emissions compared to traditional cloud-reliant workflows.

187 Tons

of CO2 offset annually (calculated per 10,000 users).

Net-Zero Alignment

Solution directly supports corporate sustainability commitments and the EU Green Deal.

Efficiency

Replaces energy-intensive cloud storage cooling and transmission with low-energy Peer-to-Peer transfer.

Simple, transparent licensing.

Free

\$0

Up to 5 active peers.
File size limit 100MB.
Community support.

Premium

\$49.95

One-time purchase.
Recommended.
Drag-and-drop multiple files.
Deep Work mode.
Up to 300 active peers.

Enterprise

\$79.95

One-time purchase.
Extended individual
support.
Priority features.

Why We Win

We fit the infrastructure that actually exists.

Works offline & air-gapped

Zero friction setup

Privacy centric (No cloud dependency)

Legacy support (Windows 7+)

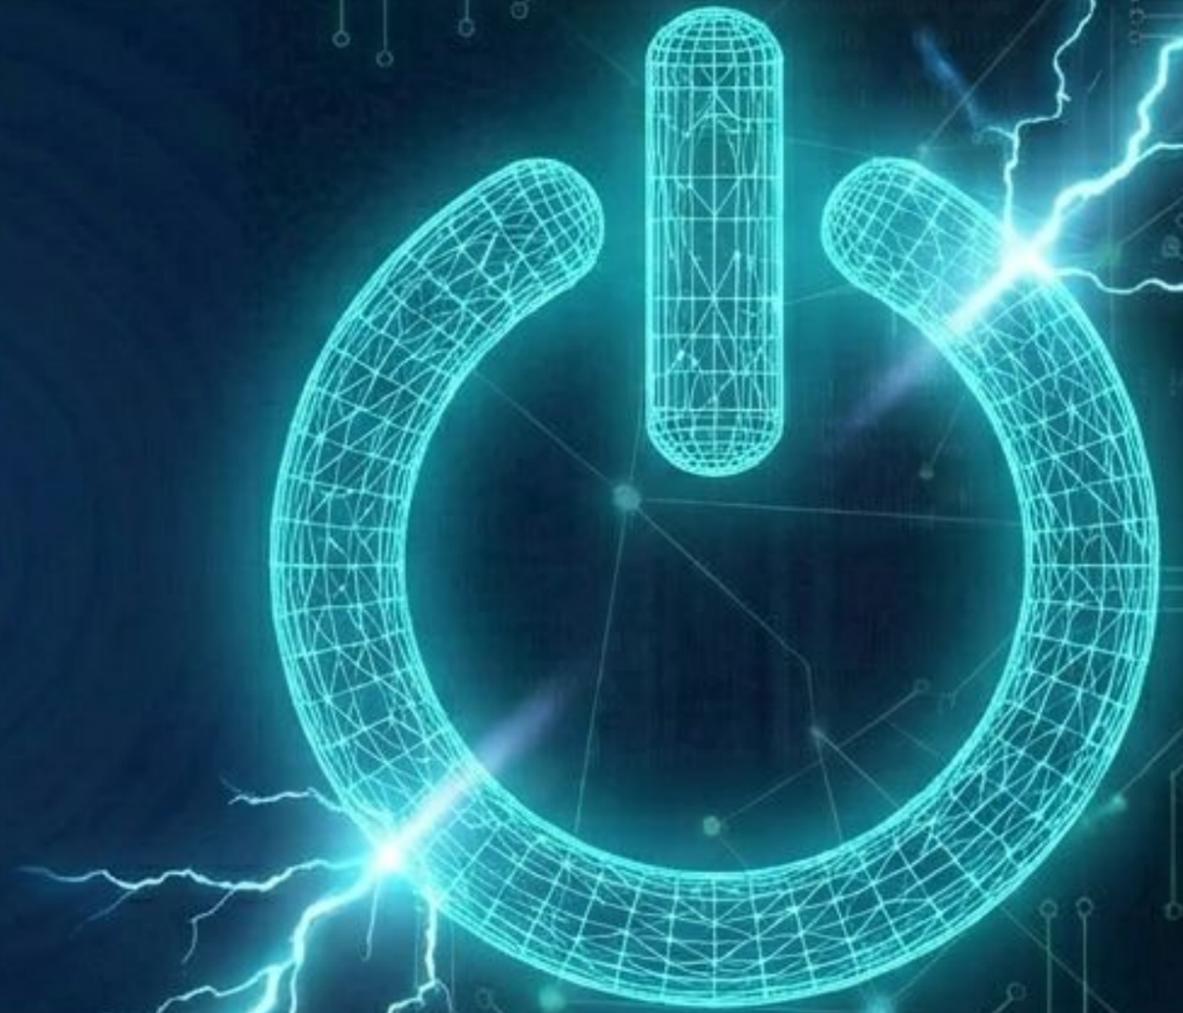

Immediate value (ROI in minutes)

Join the revolution.

- Preorder at reduced price
- Join the Beta access program
- Request Enterprise pilot

No frills - a clean, professional all-in-one dashboard

The screenshot displays the TreeTalk software interface, which is a professional dashboard for network management. The interface is divided into several sections:

- Peer List:** A table listing active peers with columns for Peer UID, Peer NickName, Peer IP:Port, and Active status.
- GROUP CHAT:** A section for group chat with a text input field, a 'Send Msg to ALL' button, a 'GRP VOICE MSG' button, and a 'Send File to ALL' button. Below the chat area is a table with columns: OfficeLink, LAN Sync, Active, and a numerical value.
- Server Status:** A table showing server information with columns: Server, Location, Load, and Uptime.
- File Transfer Log:** A table showing file transfer details with columns: Date/Time, Peer, File Name, Progress, %, Status, Open, and Open Folder.
- System Info:** A section at the bottom left showing 'Actual RCVBUF: 16777216' and 'Actual SNDBUF: 1048576'.
- Footer:** A green bar at the bottom with the text 'PRO Version: Find more useful tools at TREE-TALK.COM.'

Active Peers

Inactive Peers

The screenshot displays the TreeTalk Node v.1.21 interface. It features a peer list on the left, a group chat window on the right, and a file transfer log at the bottom. The peer list includes columns for Peer UID, Peer NickName, Peer IP:Port, and Active status. The group chat window shows a message input field, buttons for sending messages and files, and a 'WW' (Word Wrap) toggle button. The chat area displays structured, formatted data in a table format. The file transfer log shows columns for Date/Time, Peer, File Name, Progress, %, Status, Open, and Open Folder.

Different Types of System Messages in Different Colors

The screenshot displays the TreeTalk Node v.1.21 interface. The title bar reads "TreeTalk Node: 12885103 : Auditorium 112". The interface is divided into several sections:

- Private Chat (Left):** Shows a chat window for peer "iACER1" (ID: 5970343, IP: 192.168.56.1:57163). It includes a "Close" button and a "Send message to Peer..." button. A hint box is visible over the "VOICE MSG" button with the text: "Press and Hold for record, Release for send to PEER." Below the chat area is a table of file transfers.
- Group Chat (Right):** Labeled "GROUP CHAT:", it features "Settings" and "Help" buttons. It has buttons for "Send Msg to ALL", "GRP VOICE MSG", and "Send File to ALL". A "WW" (Word Wrap) toggle button is also present. A message from "Lea-on-SAMSUNG" is shown, containing a table of project data.
- File Transfer Table (Bottom):** A table listing recent file transfers with columns for Date/Time, Peer, File Name, Progress, %, Status, Open, and Open Folder.
